

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1. (Currently Amended) A motor vehicle with devices for holding objects and accessories, comprising:

at least one multifunctional holder placed in or attached to the motor vehicle; and

~~at least one device with at least one additional function~~ a plurality of holding devices wherein each of the plurality of holding devices has a physical structure different from each of the other of the plurality of holding devices for holding an item that is functionally different from an item held in each of the other of the plurality of holding devices and wherein each of the plurality of holding devices is interchangeably attachable ~~mounted detachably~~ to the at least one multifunctional holder, and further wherein each of the plurality of holding devices is attachable to the at least one multifunctional holder at a same set of attachment points that define the points of attachment between a one of the plurality of holding devices and the multifunctional holder.

Claim 2. (Original) The motor vehicle according to claim 1, wherein the multifunctional holder is placed in an interior space of one of the motor vehicle, an engine compartment, and a trunk.

Claim 3. (Original) The motor vehicle according to claim 1, wherein the multifunctional holder is provided in an interior space of the motor vehicle at one of a center console, a dashboard, a side molding of a door or lateral wall, and a back of a seat and wherein the multifunctional holder is concealed as an insert in a hollow space or openly visible at an outer surface.

Claim 4. (Currently Amended) The motor vehicle according to claim 1, wherein ~~the~~ at least one of the plurality of holding devices ~~device~~ is a holder for at least one of a container, ~~such as a beverage cup,~~ a case for glasses, glasses, writing utensils, coins, and cigarettes.

Claim 5. (Currently Amended) The motor vehicle according to claim 1, wherein ~~the~~ at least one of the plurality of holding devices ~~device~~ includes at least one electrical connection for electrically operated equipment that is held by the at least one device.

Claim 6. (Original) The motor vehicle according to claim 5, wherein the electrically operated equipment is one of a laptop, palmtop, recording system, reproducing system, mobile phone, and reading lamp.

Claim 7. (Currently Amended) The motor vehicle according to claim 1, wherein audio equipment, an ashtray, or a garbage container is held in ~~the~~ at least one of the plurality of holding devices ~~device~~.

Claim 8. (Currently Amended) A motor vehicle holding device, comprising:

a multifunctional holder associated with an interior of the motor vehicle;
and

a plurality of holding devices, wherein each of said plurality of holding devices has a physical structure different from each of the other of the plurality of holding devices for holding an item that is functionally different from an item held in each of the other of the plurality of holding devices and wherein each of the plurality of holding devices are is interchangeably attachable to the multifunctional holder at a same set of attachment points that define the points of attachment between a one of the plurality of holding devices and the multifunctional holder.

Claim 9. (Original) The motor vehicle holding device of claim 8, wherein the multifunctional holder is attached to an exterior surface of the interior of the motor vehicle.

Claim 10. (Original) The motor vehicle holding device of claim 8, wherein the multifunctional holder is integrated within a structure in the interior of the motor vehicle.

Claim 11. (Original) The motor vehicle holding device of claim 8, wherein each of the plurality of holding devices includes a mounting section that is detachably connectable to the multifunctional holder.

Claim 12. (Original) The motor vehicle holding device of claim 11, wherein the mounting sections are detachably connectable to an exterior surface of the multifunctional holder.

Claim 13. (Original) The motor vehicle holding device of claim 11, wherein the mounting sections are detachably connectable within an interior of the multifunctional holder.

Claim 14. (Currently Amended) A method for holding a device in a motor vehicle, comprising the steps of:

placing a multifunctional holder within an interior of the motor vehicle;
attaching one of a plurality of holding devices to the multifunctional holder at a set of attachment points that define the points of attachment between the one of the plurality of holding devices and the multifunctional holder,

wherein each of the plurality of holding devices is configured to hold a device with a function that is different from each other device; ~~and~~

placing a respective device with a function into the one of the plurality holding devices attached to the multifunctional holder;

detaching the one of the plurality of holding devices from the multifunctional holder;

attaching a second of the plurality of holding devices to the multifunctional holder at the set of attachment points; and

placing a second respective device with a second function into the second of the plurality of holding devices.

Claim 15. (Canceled)

Claim 16. (Original) The method of claim 14, wherein the step of attaching one of the plurality of holding devices to the multifunctional holder includes the step of inserting a mounting section of the one of the plurality of holding devices into the multifunctional holder.

Claim 17. (Original) The method of claim 14, wherein the step of attaching one of the plurality of holding devices to the multifunctional holder includes the step of mechanically connecting a mounting section of the one of the plurality of holding devices to the multifunctional holder.

Claim 18. (Original) The method of claim 14, further comprising the steps of electrically connecting the one of the plurality of holding devices to the multifunctional holder and electrically connecting the respective device to the one of the plurality of holding devices.

Claim 19. (Original) The method of claim 14, wherein the step of placing the multifunctional holder within the interior of the motor vehicle includes the step of attaching the multifunctional holder to an exterior surface of the interior of the motor vehicle.

Claim 20. (Original) The method of claim 14, wherein the step of placing the multifunctional holder within the interior of the motor vehicle includes the step of integrating the multifunctional holder within a structure in the interior of the motor vehicle.
